Demographics of Participating Institutions

Fifty four postsecondary institutions self-selected to participate in the Fall 2012 ACHA National College Health Assessment and 29,280 surveys were completed by students on these campuses. For the purpose of forming the Reference Group, only institutions located in the United States that surveyed all students or used a random sampling technique are included in the analysis, yielding a final data set consisting of 28,237 students and 51 schools. **This report includes only data from 24,179 UNDERGRADUATE students at these institutions.** Demographic characteristics of the 51 campuses follow:
