Demographics of Participating Colleges/Universities

Eighty U.S. post-secondary institutions self-selected to participate in the Spring 2004 ACHA-National College Health Assessment and 50,819 surveys were completed by students on these campuses. For the purpose of this study, only those institutions that used a random sampling technique or sampled a universe such as first year students will be included in the analysis, yielding a final data set consisting of 47,202 students and 74 schools. Demographic characteristics of the 74 campuses follow:
